25X1

1. Most of the LUDWIGSLUST-TECHENTIN (M 54/T 52) airfield kasernes were occupied by a Soviet tank unit. Some of the vacant kasernes were allegedly reserved for an air force unit. A small detail of air force soldiers under the command of Capt ZKRIEIN (phonetic spelling) was stationed at the field. This detail was under a CO who also had charge of the PERLEBERG (M 54/T 70), PARCHIM (M 54/T 74) and WISMAR (M 54/T 49) airfields.
2. Two biplanes were in an open hangar. The landing field was serviceable but had no concrete runway. The field was not lighted. A fuel dump by the spur track was filled from two railroad tank cars.

25X1

Comment:

Report confirms that the airfield is not occupied by an air unit and that a tank unit is quartered in the kasernes. The landing field, which has been reconditioned, is apparently no longer used by the tank unit as a training grounds. The presence of a small air force detail is reported for the first time. The accuracy of the information that the CO of this detail is also in charge of other airfields cannot be rated.

This document is hereby regraded to **CONFIDENTIAL** in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
